

COLLECTION 2021-2022

ROYALGRASS®  
hello happiness

---

## ENJOY LIFE

Your free time is precious. Wouldn't you prefer to spend it on other things than mowing, and fertilising your lawn? You could be spending it with family and friends. So choose artificial grass from Royal Grass® .

---

---

## SEDUCTIVELY BEAUTIFUL

Our grass should be as realistic as possible. It should look like grass.  
It should feel like grass.  
It should be grass.

---

---

## QUALITY GUARANTEED

Since 2003 we've been manufacturing artificial grass. In that time, we've built up a reputation. With our 15 year warranty you can be rest assured you can enjoy your lawn for a long time.

---

# THE MOST INNOVATIVE TECHNOLOGY

It is our main goal to make a perfect copy of the characteristics of natural grass; up till microscopic level. This has led to several revolutionary breakthroughs.

Borrowed from nature: the exclusive V-shape.

Micro nerve technology gives the fiber a mat, silky colour and strongly reduced reflection.

The backbone strengthens the fibre to keep it nicely upright.

## Royal Grass V-Shape®

When you put a blade of grass under the microscope, you'll see that it has a V-shape. Royal Grass® is the only artificial grass with that same patented V-shape. Combined with the reinforced backbone, this ensures the grass blades all stand upright.

## Micro Nerve Technology®

Natural grass has a bit of a natural glow. We wanted our artificial grass to have that as well. Our Micro Nerve Technology (MiNT) ensures that you can hardly tell our grass from natural grass when it comes to that glow.

## Realistic Directional Yarn®

Natural grass can be quite capricious: every blade has its own direction. Thanks to our Realistic Directional Yarn (ReaDY) technology, we were able to give our artificial grass that same natural volatility. With ReaDY® technology artificial grass really springs to life.

## SunTEC

Our latest development SunTEC gives our blades of grass a sun-kissed look. It is now available for selected Royal Grass® products. Of course, not all blades are brown, just the odd blade here and there. This gives the grass a natural summery look. Your lawn isn't absolutely perfect, which actually makes it perfect for a summer garden.

## 9 year warranty

We offer a 9-year warranty on all defects that can reasonably be attributed to the manufacturing of the artificial grass.

---

## ROYAL GRASS® COLLECTION

We manufacture artificial grass that really looks like natural grass. From lush grass that looks like it is just about ready to be mowed, to beautifully short cut grass. From grass that looks like it has been in the hot summer sun, to grass that simply looks nice and green.

---

ROYALGRASS®

# EcoSense

Soft, seductively beautiful and also the first type of artificial grass that is 100% recyclable. A full grass, exceptionally soft and resilient.

## EXTREMELY STRONG

Royal Grass® is artificial grass of premium quality made with only the best raw materials. It is incredibly resilient and durable.

You can just let your dog run around on your lawn. It's not a problem! Royal Grass® won't turn into a muddy mess. Of course, an accident can happen at any time. But don't worry. Urine won't damage the grass and is easily removed

---

---

## 100% SAFE

Royal Grass® artificial grass has been tested according to the EN71-3 standard. This European standard is known to be one of the most stringent standards of safety and is also applied to toys, for example. All our products have been put through this test. And if there is one thing clear: all our products are guaranteed to be safe.

---

---

## ROYAL GRASS CAN BE RECYCLED

We all have a responsibility  
towards the environment.  
And we are taking ours.  
Among other things,  
we do this with our  
Conscious program.

---

---

## MADE IN HOLLAND WORLDWIDE ENJOYMENT

Royal Grass® has been fully focused on the development, production and marketing of artificial grass since 2003, with worldwide delivery from the Netherlands to more than 45 countries.

Our starting point is the optimal imitation of natural grass, without its disadvantages, such as mowing, watering and fertilising. Landscape Solutions B.V. wants to make it clear with the brand name 'Royal Grass' that this 'royal grass' is of the highest quality.

Royal Grass® artificial grass is developed and produced in the Netherlands with the best raw materials from European suppliers. The quality artificial grass is manufactured in Genemuiden, the Netherlands.

## SUSTAINABLE

Our mission is not only to make the most beautiful artificial grass, but also to do this in an environmentally friendly way. For that reason, our factory has been equipped with solar panels that provide us with most of the energy needed to produce artificial grass. In recognition of our efforts, we've been certified with ISO 9001 and 14001. This means we adhere to the most stringent European environmental and quality requirements.
